

## **Employment Opportunities Computational Linguists, Software Engineers and Lexicographers**

ToggleText is a company specialising in the development of automatic translators for the web and enterprise solutions. You may find out more about us at [www.toggletext.com](http://www.toggletext.com) The company will be undertaking a number of major research projects in natural language processing (NLP) in the new financial year (i.e. after 1 July 2006) and is seeking expressions of interest from suitably qualified computational linguists, software engineers and lexicographers.

### **Computational Linguists**

Computational Linguists with graduate or post-graduate qualifications will be sought as part of a multidisciplinary team. They should possess a solid foundation in morphology, semantics, syntax and other branches of linguistics.

Experience in language parsing and working in multi-developer software projects would be desirable. Programming experience in Prolog, Perl, Python or C/C++ would be highly desirable.

### **Software Engineers**

Software engineers with graduate or post-graduate qualifications in computer science will be sought as part of a multi-disciplinary team. They should possess a solid foundation in C/C++, Unicode, XML and QA processes. Experience with Linux/Unix and Windows environments is desirable. VB.net or SQL skills would be an advantage.

Experience in NLP technology would be a plus as would enthusiasm for solving interesting problems. Good communication skills are essential.

### **Lexicographers – Malay and Tagalog**

Malay and Tagalog lexicographers with graduate or post-graduate qualifications will be sought as part of a multidisciplinary team. Malay or Tagalog language studies, linguistics or ESL qualifications would be highly regarded. Native or near-native Malay or Tagalog language skills are essential.

Experience encoding foreign language terminology according to specific conventions would be highly desirable but not essential. The willingness to learn, to follow instructions and cooperate in a team effort would be highly regarded.

If you have the qualifications, skills and experience for any of these roles please respond provide a Curriculum Vitae along with contact details (phone and/or email) of a suitable referee. Applications close on 15 September 2006.

Submit applications to: Meladel Mistica [meladelmistica@toggletext.com](mailto:meladelmistica@toggletext.com)

**Please note only short-listed candidates will be contacted.**
